

Retention Packagings

safetyBag®

Gut verpackt

A special stretch mechanism ensures that the stretch film fixes the product firmly to the corrugated cardboard format and prevents slipping. The highly flexible but virtually tear proof stretch film adapts to the different product contours like a second skin.

Your advantages

- optimum protection for the most varied products and contours
- quick and simple handling
- reduction of packaging diversity up to 90%
- re-usability thanks to the films excellent resilience and high elasticity
- environmental sustainability (disposal with waste paper)
- professional appearance

Several process costs can be minimized thanks to retention packaging. (e.g. for purchase, storage, damages in transit, waste disposal, etc.)

Due to flexible films even round, pointed or oddly-shaped objects of different sizes can be safely packed. Hollow spaces can be used for storing accessories or manuals.

With only 4 moves ...

your product is ...

fixed and ...

safely packed!
